

Professional Summary

Third-year Computer Science undergraduate (CGPA: 8.73/10) with hands-on experience in building scalable full-stack web applications, real-time monitoring systems, and data-driven platforms. Strong foundation in frontend engineering, backend API development, and scalable system design through industry training and academic projects.

Education

Bennett University, Greater Noida, India

Aug 2023 – Present

Bachelor of Technology in Computer Science (AI/ML Minor)

CGPA: 8.73/10

Relevant Coursework: Database Systems, Operating Systems, Software Engineering

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, SQL

Frontend: React.js, HTML, CSS

Backend: Node.js, Express.js, REST APIs, Authentication (OAuth 2.0, JWT)

Databases: MySQL, MongoDB

Tools & Technologies: Git, GitHub, GitHub Actions, Postman

Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design

Experience

Frontend & Backend Developer (Trainee)

Jun 2025 – Aug 2025

Research Design & Standards Organisation (RDSO), Indian Railways — Lucknow, India

- Implemented backend services to ingest, validate, and process 1,200+ real-time telemetry signals per cycle, ensuring 99.7% data integrity under continuous data streams
- Developed scalable RESTful APIs for querying braking metrics, fault events, and historical train data, with structured error handling and input validation.
- Collaborated with 6+ railway engineers and peer developers to translate official railway safety standards into scalable software modules, cutting deployment time by 30%.
- Optimized system responsiveness by 20–25% through frontend rendering optimization and backend data-flow tuning, reducing page load times from 2.8s to 2.1s.

Projects

Learn Loop 🔄 — AI, EdTech, Full Stack Development

Apr 2026

- Built an **AI-powered learning platform** to generate flashcards, summaries, and flowcharts for **efficient learning workflows** from unstructured study materials using **LLMs**.
- Executed **YouTube data extraction and summarization pipelines** using APIs and NLP techniques to convert video content into structured learning modules.
- Designed an interactive **React.js-based UI** with features like **spaced repetition** and automated quiz generation to personalize learning paths.
- Increased user engagement and retention by integrating **adaptive learning workflows** and AI-driven recommendations, supporting 100+ users and reducing study time by 25%
- **Technologies:** React.js, Node.js, Express.js, REST APIs, LLMs, NLP, YouTube API

AI Code Fixer — Automated GitHub Code Review and PR Generation System 🔄

Mar 2026

- Automated repository workflows using **GitHub REST APIs**, enabling file retrieval, branch creation, commit management, and pull request generation.
- Secure authentication using **OAuth 2.0**, enabling controlled access to repositories and user-specific analysis.
- Integrated an **AI-powered code analysis system** using **LLMs (OpenRouter)**, generating automated bug fixes and improvement suggestions.
- Accelerated developer productivity by automating code review tasks, reducing manual debugging effort by 30% and improving code review efficiency by **30%** and improving turnaround time.
- **Technologies:** Node.js, Express.js, React.js, REST APIs, OAuth 2.0, LLM Integration

Leadership & Activities

- Participated in 5+ national and intra-college hackathons, delivering end-to-end software solutions under strict time constraints.
- Collaborated in 3–5 member cross-functional teams to ideate, build, and present functional software prototypes.
- Achieved Round 2 qualification in the Smart India Hackathon (SIH); the team demonstrated innovation in real-time schedule updates and secured a Top 100 ranking within the college, as rated by judges.
